### **WEATHER OF CONCERN**

### **Weather of Concern**

• There is no weather of concern.

### Weather Advisories, Watches, and Warnings currently active in California:

http://www.wrh.noaa.gov/hazardSummary/?state=ca

### **Active Weather Warnings, Watches and Advisories by County:**

http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1

### **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

High pressure off the California Coast will be our dominant weather feature through Friday. Afternoon temperatures will be as much as 15 degrees above normal through Friday. NW-NE downslope surface winds will reach 25-35 mph in wind-prone areas from the western Sierra slopes to the coast through midday today, with the strongest winds during the morning hours. Afternoon minimum relative humidity (RH) readings will be 15-25% in inland areas affected by the winds, and 20-30% otherwise.

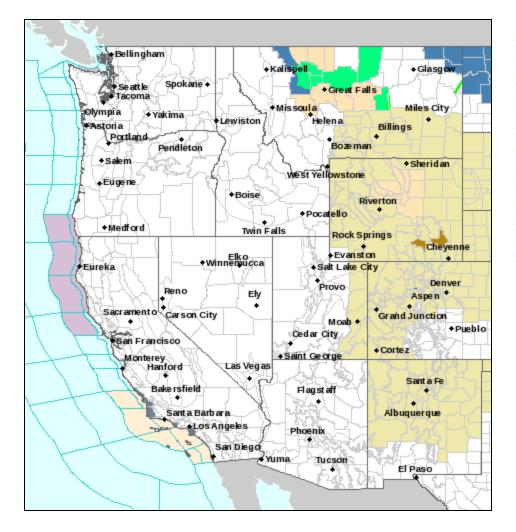

A weak low pressure trough will move across the region this weekend. Temperatures will be a few degrees cooler, but still above normal, and humidity will be higher. Skies will be partly cloudy. At this time this feature is not expected to produce wetting rain. A slightly stronger trough will move through Tuesday night and Wednesday with light rain mainly in the north and east. A third system is expected late next week. In general, the period through mid April will likely be characterized by stretches of warm, dry, and breezy weather lasting 1-4 days, interrupted by weak weather systems that will produce mostly light rain and high elevation snow, leading to overall drier and warmer than normal conditions.

#### **SOUTHERN CALIFORNIA**

A ridge of high pressure will approach the California Coast and push inland bringing a slow warming trend to the region through Friday. The ridge of high pressure will weaken bringing a slow cooling trend to the area Saturday through early next week. Minimum humidity will be mainly between 15% and 30% away from the coastal areas through early next week. Winds will be light across the region through early next week.

## **Cal OES LAW ENFORCEMENT MISSIONS**

### **Cal OES Law Missions**

Nothing significant to report.

### **Cal OES MISSION TASKING**

### **Cal OES Missions**

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties.
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

### Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
